EDUCATION

M.Tech in Computer Science, IIT Kharagpur (GPA - 9.02) Aug 2022 - Apr 2024

B.Tech in Computer Science, Biju Pattnaik University of Technology (GPA - 8.42) Aug 2015 - Apr 2019

SKILLS

Tools AWS, Spring Boot, Micro-services, React, Redux, Node JS, SQL, NoSQL, Angular

Programming Java, Javascript, Python

EXPERIENCE

Senior Software Engineer May 2024 - Present
Emmes Services Pvt. Ltd. *Bengaluru, India*

- Collaborate with cross-functional teams to resolve bugs, ensuring smooth and efficient software performance.
- Built user interface components, enhancing the overall user experience through responsive and intuitive design.
- Design and implement backend services, creating and managing APIs within a cloud architecture to support robust and scalable applications.

Software Developer - Freelance Sep 2022 - Jan 2023
Construction Check *Remote*

- Engineered interactive interfaces and common components in Vue, ensuring project consistency.
- Collaborated with teams to identify and resolve bugs in the project, improving product quality.
- Coordinated closely with clients, delivering timely updates, incorporating requirements, and resolving feedback to drive project success.

Senior Software Engineer Dec 2020 - Jul 2022
Divami Design Labs *Hyderabad, India*

- **Led a team of 4 in building a comprehensive learning platform**, overseeing the entire lifecycle from conception to deployment, ensuring timely delivery of a high-quality product.
- Collaborated with cross-functional teams in Agile environments to deliver timely high-quality software solutions.
- Developed APIs using the serverless framework, designed databases, and **optimized query performance by 20% for seamless client-database communication**.
- Leveraged React to create complex components and reusable services, enhancing user experience and codebase maintainability.
- Maintained regular communication with clients, providing updates and addressing requirements and feedback to ensure satisfaction.
- Delegated tasks, monitored progress, and guided to ensure smooth project execution.
- **Mentored 15 junior team members in Angular and React**, fostering their professional growth.

Software Engineer May 2019 - Nov 2020
Divami Design Labs *Hyderabad, India*

- Created responsive, high-quality User Interfaces using HTML, CSS, JavaScript, Angular, and React, following a test-driven approach.

- Improved product stability by resolving bugs and designing reusable UI components, **increasing development efficiency by 25%**.
- Contributed to API design in a Serverless architecture with Node.js, optimizing backend performance.
- Debugged legacy Uniface applications, enhancing functionality through business rule establishment and query optimization.
- Led code reviews and mentored junior developers, fostering a collaborative and growth-oriented environment.

PROJECTS

Shared Services (Blueyonder). Developed shared common services and libraries, and implemented E2E testing **reducing bugs and regression issues by over 30%**.

Ontelo.io Developed an interactive learning platform facilitating user enrollment for teaching and learning activities using React, Serverless architecture, and PostgreSQL.[\(Try it here\)](#)

Portfolio Merchandise Management (Blueyonder) Revitalized the PMM application by debugging legacy Uniface code and transforming it into a modern web platform using React, Node.js, and PostgreSQL, **improving performance efficiency by 25%**.

One Money. Contributed to developing One Money, an account aggregator platform built using Angular.[\(Try it here\)](#)

Simply Science. Developed UI components for an educational platform catering to students from grades 6 to 12.[\(Try it here\)](#)

STS Payone. Developed UI components in Angular and collaborated with the bug-fixing team to promptly address UI issues, preserving a seamless user experience throughout the platform.

Carbon Footprint Tracker. Created application to track carbon emissions, ensuring reliable functionality.[\(Try it here\)](#)

LEADERSHIP AND ACHIEVEMENTS

- Achieved **AIR 141 in (GATE)** - Computer Science (CS) in 2022.
- Earned “Above and Beyond” as Senior Software Engineer “Rockstar” awards at Divami.
- Ranked 3rd in Divami Annual Dev Hackathon.
